

# Emergency Landing of a Helicopter in Călărași District

Today, June 5, 2025, a KA-32 civilian helicopter registered in Ukraine, en route from Mărculești to Constanța, made an emergency landing in Călărași District after the crew reported significant vibrations during the flight.

The crew decided to land immediately, following operational safety procedures to avoid any further risk.

The crew notified the MoldATSA Air Traffic Service about the emergency situation, which in turn alerted the search and rescue services according to established procedures.

The landing was carried out safely, with no casualties or material damage reported, and intervention teams were not required to deploy.
