Allocations paid to the national public budget from the air transport sector in 2025

The year 2025 confirms the upward evolution of air transport in the Republic of Moldova. The analysis conducted by the Civil Aviation Authority highlights not only solid operational activity, but also a substantial economic contribution.

Total revenues generated from the main activity: 10,063,890 thousand lei
Contributions to the national public budget: 604,493 thousand lei

Civil aviation does not only mean mobility and connectivity — it also means investments, jobs, and sustainable economic development.

We continue to strengthen a competitive, safe, and performance-oriented sector.
